## { Experience }

**Lead Mobile Developer / GoodGuide** 2013-Present

Responsible for building features for and maintaining GoodGuide's iOS app and multiple APIs. Took over mobile lead after having built core Solr, Backbone.js and custom entity value store components and Chef recipes for internal Docker Registry and app distribution and performing extensive Python data analysis.

**Senior Software Engineer / Instacanvas** 2012-2013

As a full stack developer at an early stage startup, the majority of the active code used by twenty20.com was been created and maintained evenly by me and one other developer. Responsible for helping create the company's development process, Chef server distribution, monitoring and services, aiding team growth, interviewing candidates, coordinating requirements and on-boarding with contracted developers.

**Senior Software Engineer / The Dolan Company** 2012

Worked as a Senior Software Engineer, touching all parts of the U.S's largest national legislative tracking software, utilizing various technologies including Solr/Sunspot, Chef, Vagrant, JRuby and Trinidad.

**Web Developer / Rackspace** 2012

Worked as Web Developer, making updates and doing bug fixes to the open source project OpenStack's dashboard using Python/Django and HTML/CSS/JavaScript.

**Software Engineer / Olson** 2011-2012

Worked as Software Engineer, performing software and website development for companies including Bauer Hockey, Target, KidRobot and Boston Scientific, using a wide variety of languages and frameworks, such as Java, ColdFusion, Objective-C, ColdBox, Flex, Javascript and Apache Ant/Ivy.

## { Skillset }
